

North

What To Look For On Your Hike:

- keep your eye on the tower and you will always find your way back
- vegetation, hundreds of species of grasses and wild flowers
- notice how the plants hold the hillside soil intact
- prickly pear and globe cactus are typically on the south side of cactus ridge-watch your step!
- chokecherries, saskatoons and goosberries in the woods (shaded areas on map)
- can you find wild strawberries and wild onions?
- ironstone rocks high atop the hills
- hawks flying overhead, see if you can spot some nests in the trees
- turkey vultures circling the area in search of food
- animals commonly seen are deer, coyote, skunk, fox and gopher

Reminder:

Please do not to remove any plants or rocks, leave for others to enjoy. Take lots of pictures! Enjoy!
